# MICORK PINBOARD ROLLS AND SHEETS

**Cork is one of nature's most versatile materials and has a wide range of applications, available in rolls or cut to size sheets in a wide range of thicknesses.**

**Cork is also a fully sustainable and environmentally friendly resource, thanks to the unique nature of its gathering. In fact, cork is one of the greenest alternatives out there and is 100% natural, renewable and recyclable.**

**Cork is one of the most renewable and sustainable resources on the planet. In fact, a cork tree can be harvested multiple times in its 200-300-year lifespan, supplying cork for many generations. Cork harvesting neither cuts down or harms the cork tree itself, meaning it continues living and is incredibly eco-friendly.**
